## REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a decoding method for retrieving information bits encoded in a printed image. The closest prior art, Ng et al. (USPN 5,699,102), shows a similar system, in which, a copier/printer system includes an image scanner for scanning a document and providing, after a compression step, digital image scanning signals, that may be communicated to a computer system for display and editing or alternatively communicated to a grey level printer having a magnetic tape memory. The computer system may be used to display the scanned image for editing by an operator and is coupled to the printer so that the edited image signals, which may be the scanned signals and a common page description language to modify its usage, may be printed by the printer. However, Ng et al. fail to address: "for extracting a region of interest in the image, estimating, for said region, amount of K colorant present, denoted Kh, obtaining, for said region, a color value, determining

the GCR used for encoding that region using Kh and said obtained color value and retrieving encoded information bits based on said determined GCR". These distinct features have been added to the sole independent claim and renders it allowable.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance
